| Year 11     |                                       | 13.1* | Factors and multiples SCHEME B  | Use the concepts and vocabulary of prime numbers, factors (divisors), multiples, common factors, common multiples, highest common factor, lowest common multiple, prime factorisation, including using product notation and the unique factorisation theorem.  Apply systematic listing strategies  Enumerate sets and combinations of sets systematically, using Venn diagrams  | 27 to 32<br>33 to 36  |
| Autumn Year | 13 Factors, powers and roots (Number) | 13.2* | Powers and roots SCHEME D Surds   | Apply systematic listing strategies including use of the product rule for counting. Use positive integer powers and associated real roots (square, cube and higher), recognise powers of 2, 3, 4, 5; estimate roots of any given positive number. Calculate with roots, and with integer indices;   Calculate exactly with surds; simplify surd expressions involving squares (e.g. $\sqrt{12} = \sqrt{4} \times 3 = \sqrt{4} \times \sqrt{3} = 2\sqrt{3}$ )   | 671 to 673<br>99 to 110   |
|             | 14 Graphs 1<br>(Algebra)              | 14.1  | Equation of a straight line SCHEME C and E  Linear and quadratic functions SCHEME E  Properties of quadratic functions SCHEME E | and rationalise denominators.  Understand and use standard mathematical formulae; rearrange formulae to change the subject.  Work with coordinates in all four quadrants. use the form y = mx + c to identify parallel lines; use the form y = mx + c to identify perpendicular lines; find the equation of the line through two given points, or through one point with a given gradient. Identify and interpret gradients and intercepts of linear functions graphically and algebraically.  Express a multiplicative relationship between two quantities as a ratio or a fraction.  Relate ratios to fractions and to linear functions. Interpret the gradient of a straight line graph as a rate of change;  Plot graphs of equations that correspond to straight-line graphs in the coordinate plane;  Recognise, sketch graphs of linear functions and quadratic functions, find approximate solutions using a graph.  Identify and interpret roots, intercepts and turning points of quadratic functions graphically; deduce roots algebraically; deduce turning points by completing the square.  Recognise, sketch and interpret graphs of quadratic functions, Solve quadratic equations algebraically by factorising; by completing the | 201 to 204<br>206 to 216<br>205, 251 to<br>257<br>251 - 257,<br>260 |
|             | 15 Working in 3D<br>(Geometry)        | 14.4  | Kinematic graphs SCHEME C  3D shapes Scheme B  Volume of a prism SCHEME D & E   | square find approximate solutions using a graph.  Plot and interpret graphs; graphs of non-standard functions in real contexts, to find approximate solutions to problems such as simple kinematic problems involving distance, speed and acceleration.  Use conventional terms and notations: vertices, edges, draw diagrams from written description.  Identify properties of the faces, surfaces, edges and vertices of: cubes, cuboids, prisms, cylinders, pyramids, cones and spheres.  Construct and interpret plans and elevations of 3D shapes.  Use compound units such as density Compare lengths, areas and volumes make links to scale factors. Use standard units of measure and related concepts (length, area, volume/capacity, mass, time, etc.)  Know and apply formulae to calculate: area of triangles, parallelograms, trapezia; volume of cuboids and other right prisms (including cylinders).  Know the formulae: circumference of a circle = 2πr = πd, area of a circle = πr²; calculate areas of circles and composite shapes.  | 300 - 302<br>874 - 879<br>880 - 882<br>829 - 844                    |
